

Andrew Cosmic

Senior Full Stack Developer

EXPERIENCE

RPI Print, Seattle, WA — Full Stack Engineer

September 2020 - current

Implemented backend functionality for cart, checkout, and orders, including APIs, database integrations, Flyway migrations, and JOOQ-generated types, using Java with Vavr.

Built a mobile-first, accessible component library and used it to create pages.

Created health checks for critical services and authored AWS CDK infrastructure code to automate frontend deployments to dev environments for PR testing.

Mentored a new developer in Astro while collaborating with design and translation teams to deliver a redesigned homepage, product pages, and reusable React/Astro components for Blurb's website.

Liveperson, Seattle, WA — Full Stack Engineer

April 2020 - May 2024

Significantly elevated unit test coverage to minimum of 80%. Greatly improved documentation, addressed bugs, enhanced code quality. Mentored new employees.

Developed SSO applications with rigorous testing.

Designed and implemented a seamless Gitlab to AWS pipeline, orchestrating the project build process, containerization and blue green deployment.

Developed a shell script for converting Markdown files into a format compatible with Kontent. Designed the backend and set up the frontend, creating a system that allows seamless content updates from Kontent to a static site. Engineered content update systems with Gatsby and React.

Glympse, Capitol Hill, WA — Software Engineer

September 2019 - March 2020

Resolved bugs, revamped app aesthetics, and integrated Here Maps for the Enroute Console App.

Implemented new features, conducted end-to-end testing via TestFlight, addressed bugs, and improved app accessibility for Journey 3 and Journey Builder.

Developed and implemented CI/CD pipelines across all projects, utilizing Docker containers and AWS for storage. Created scripts for building, testing, version updating, and publishing applications.

Infosys/ Microsoft, Issaquah, WA — Frontend Developer

September 2018 - September 2019

Developed reusable React widgets and components within an Agile environment.

Implemented automated testing, including unit tests and end-to-end tests.

Integrated with Azure CI/CD pipeline for automated testing, and utilized GraphQL for all API calls.

Kent, WA 98031

SUMMARY

Accomplished Full Stack Engineer with 9+ years experience in developing and enhancing scalable, user-friendly web applications across various industries. Proficient in React, Node.js and TypeScript, with a strong focus on optimizing performance and improving code quality. Collaborative with cross-functional teams, driving projects independently and mentoring team members to achieve high standards. Passionate about leveraging technical expertise to drive innovation and deliver impactful software solutions while continuously seeking to stay current with industry trends.

KEY SKILLS

Javascript	React	Typescript
Node.js	Gatsby	GraphQL
Tanstack query	Material UI	Jest
Test Automation	Software Architecture	CI/CD pipelines
Java	Selenium	Grafana
ESlint	K8s	Docker
Spring Framework	API development	Sql and NoSql DB
Tailwind	AWS, GCP	Agile
Microservices	Scalability	Restful API

EDUCATION

Seattle Central College, Seattle, WA —
Database Administration & Development Cert
GPA 3.97, Dean's List, President's List

Oakland University, Rochester, MI —
Bachelors Pre-Law
